

Christmas Star

Matthew 2

Star 1

1. Using the big triangle on this page as a cutting guide, cut four triangles out of the yellow paper.
2. Glue two of the triangles together like this to form a star shape. Do the same with the other two triangles. On each star cut from one point to the center as shown with a dotted line on the diagram.
3. On each star, put a thin line of glue around the edge and sprinkle glitter. After this is completely dry, turn the stars over and do the same on the other side.
4. Fit the slits on the two stars into each other. Make a small hole near the top on one star so you can hang it by the thread.
